

How to find you plat/lot:

1. Go to the link <https://arcgis.racinecounty.com/MapBook/> (this link is above these instructions on the home page)
2. Type your address in the search bar on the upper, left area of the screen. Only use your house number and the street name (no need to include W or E or punctuation)
3. Increase or decrease the map size by using the + or – on the upper, left side of the screen. (You may need to reposition the map several times with your cursor)
4. Once you have located your plat/lot you can change the view from lines to foliage and roof tops.
5. In the upper, right corner, click on the four-square icon and a screen will appear called “Basemap Gallery”
6. Click on “Imagery with Transportation” to see an aerial type map with foliage and more (the view will become clearer over time)
